

Biovate®

Certified clean, verified green

Developed in smart city Eindhoven, Biovate® is a multifunctional, biobased surface for professional interiors. With a small footprint and exceptional performance, it sets a new standard for sustainable design materials. Customized in all prints and colors.

Made for professionals who care about what they create.

Made for Circular Future

The certified biobased base for design.

Sustainability & Innovation

Developed and produced in-house.

Designed for circular, responsible architecture.

Customisable in every color and print tailored for any design vision.

Made from recycled PET bottles reducing waste and closing the loop.

Biobased coating from renewable sources for a lower environmental impact.

Performance

Scratch- and impact-resistant surface.

Deep color saturation and lasting brilliance.

Ready for contract & project applications tested for performance and durability.

Smarter finishing for lower costs, while saving time and labor for a beautiful seamless look.

Health & Safety

Breathable no toxic emissions.

Free from PVC, VOCs, and isocyanates.

Tested and certified by accredited laboratories.
